The Mammoth Mining company yesterday declared its regular monthly dividend No. 23, of \$20,000, payable on Thursday, Oct. 1, 1896. The transfer books of the company will be closed Sept. 25, and reopened Oct. 1. The Mammoth has been a heavy dividend payer and this disbursement will bring the total paid to date up to the handsome sum of \$2,000,000. The mine never was in a more promising condition than it is today, while the fine new mill, which is one of the best to be found in the west, is now working most satisfactorily. The completion of the branch railroad from the main line to the mill and mine will greatly facilitate the operation of the property, and from now on the Mammoth should make a greater showing than ever before.

SOUTH SWANSEA IN DEMAND.
A Bull Day in the Pit-Dalton Makes Advances. The stock market was rather weak yesterday, as far as the listed shares were concerned, and the leading dividend payers were slighted throughout the call in the bidding. Sellers were plentiful, however, and gilt-edged stock was freely offered at very low figures. South Swansea was wanted on a rising market, and made sales at steadily advancing quotations. Dalton was also in good demand, and developed a strong upward tendency. At the close of the call it was announced that immediately after the call on Monday next a meeting would be held to consider Mr. Bacon's proposition. The transfers for the week were as follows:

SALES FOR THE WEEK.	
Monday	1,200
Tuesday	200
Wednesday	2,400
Thursday	3,000
Friday	100
Saturday	1,200
Total sales	8,200
SALES OF STOCK.	
The transactions of the day were as follows:	
100 South Swansea at 74 cents.	
1,000 Dalton at 2 cents.	
Total sales, 1,200 shares.

THE DALTON MINE.

Advances in Stock Quotations and Heavy Orders Given. Since the publication in these columns of the fact that Messrs. Dan Ferguson and G. F. Dalton had secured a lease on the old workings of the Dalton mine, at Marysville, and that these gentlemen expected to begin at once the extraction of rich gold ore, there has been a decided advance

JAMES A. POLLOCK,
160 Main Street.

Stocks bought and sold for cash or on commission. Weekly market letter and quotations upon application. E. G. Woolley, Jr. Member Salt Lake Stock Exchange.

in the quotations on Dalton stock, and already sales have been made at better figures than have been noted for the last four months, and it is predicted in mining circles that the stock will go still higher.

Yesterday The Herald was informed that a stock buyer had placed a thousand dollars with his broker for the purchase of Dalton stock; while one of our leading brokers has been requested to purchase 10,000 shares at the lowest possible price.

The new departure at the Dalton mine will be watched with interest in Utah mining circles, and if Messrs. Ferguson and Dalton can accomplish half what they claim they can do, Dalton stock should make rapid advances. A large amount of work is being done in the vicinity of the Dalton mine. The Aurora is making a fine showing, and the discovery of a rich body of ore in the Wedge mine has fired the hearts of claim owners in that locality; while the big strike reported in the Westmoreland mine in Baldion canyon, is causing great excitement throughout the district. On the Cottonwood side of the mountain the Crystal company is employing a force of men in the development of its fine property; but, on account of the slump of the metal market, but little ore is being taken out.

The completion of the branch of the R. O. W. V. line, as far south as the mouth of Clear Creek canyon, will do much towards stimulating the growth and prosperity of the camp, and by another year we may see a great increase in the Dalton district, especially as next season there promises to be considerable work done in the development of the gold placer deposits of that region.

IN EASTERN NEVADA.
More Activity Noticeable and the Outlook Brighter.

A. J. Spencer, of Toano, Nevada, who is associated with J. H. Cazier in the freighting business, is in the city on business. Spencer & Cazier are doing the heavy freightage for eastern Nevada south of Toano, and in this business they keep five twelve-mile teams on the road, and more if necessary; and they reach out to the camps of Muncy, Ely, White Pine, Cherry Creek, Kinsley, Deep Creek and other mining districts. The firm has just finished hauling the lumber and machinery for the new cyanide mill being built by the North Mountain Mining company at the old San Jose mine, in Egan canyon, Cherry Creek, and it is expected that before the company will be ready for operations. Mr. Spencer speaks very highly of the San Jose mine, and says that if the cyanide process will work the ore satisfactorily, the success of the company is assured, as there are thousands of tons of ore blocked out in the mine ready for extraction, while on the dump there are over 8,000 tons of gold quartz that will run \$15 to the ton. The mine is extensively developed, while the property is equipped with a large amount of machinery, ore houses, blacksmith shops, assay office, boarding house, etc.; and as there is scarcely any doubt but that the cyanide process will save a large per cent of the gold, as the ore has been thoroughly tested by the McArthur-Forrest process, the company, which is composed largely of Salt Lickers, feels well assured that it is strictly in line.

Since his arrival in the city Mr. Spencer has contracted to haul and ship the ore from the Kinsley mine to this city; and as it is the intention of the owners of this property—Messrs. Chisholm, Kendall, Bradley and the Dunyans—to make regular shipments, Spencer & Cazier will have an all-winter job before them. Mr. Spencer informs The Herald that the mining outlook for eastern Nevada is much brighter than it has been for the last five years, and that several old producers there will soon enter the shipping list.

FLOURING MILL.
Articles of Incorporation of the South Jordan Milling Co. Filed.

Articles of incorporation of the South Jordan Milling company were yesterday filed in the office of County Clerk Stanton. Fifty residents of South Jordan and vicinity are the incorporators, and the capital stock is placed at \$10,000, divided into 1,000 shares of the face value of \$10 each and 250 shares are subscribed for. Archibald Gardner is president of the company; Isaac John Ward, vice president; William M. Holt, treasurer, and John Holt, secretary, who, with Walter H. Atwood and James P. Jensen, form the board of directors. The property of the company consists of a large tract of real estate, a right of way for a mill race. The object of the company is to establish and conduct a flouring mill on the property mentioned above.

THE CHECKMATE MINE.

A Bonanza in Which Salt Lickers Are Interested. The Checkmate mine, in Willow Creek district, promises to develop into one of the most productive properties in the west. This mine is owned by Salt Lickers, among them being John Young of the Union Pacific system, and prominent citizen of Idaho.

The Boise Statesman, in speaking of this bonanza, says: "Ever since operations were commenced on the Checkmate mine in the Willow Creek district the owners of the property, and Manager Chapin in particular, have been making a name for themselves as to the value of the ore. The Statesman is in a position to state, however, that the Checkmate ore is far richer than even the most elaborate assays have shown. The last ore shipped to Salt Lake from this property was worth seven hundred ounces of gold to the ton. The car load brought \$3,000 above all charges, and a car shipped just before netted \$5,700."

FOUND WEALTH AT LAST.

A Montana Man and Wife Work Hard For Twenty Years. State Land Agent Page, who returned a few days ago from Madison county, where he has been examining and appraising state lands, says that the Herald of Helena, Montana, brings the news of the good fortune that has befallen A. W. Tanner and wife of Red Bluff.

He says they have struck it rich after nearly a quarter of a century of hard work and considerable expense in developing a placer property on Pole creek, six miles north of Red Bluff. Mr. Page says he visited the ground and was surprised to see Tanner washing out gold at a rate that made him think of the lively days in Alder gulch. While he was there he saw ground washed that went \$4 and \$5 to the pan. The recent strike has created great excitement in that section of the state and keeps Tanner and his wife busy answering congratulations from friends.

The good luck that has come to the Tanners is certainly the just reward of patience and hard work. For twenty years or more they have kept pegging away expending money and working hard, and their neighbors laughed at them and said they were foolish to be expending money "gophering" away in what looked like a piece of useless placer

work. Now that they have struck it rich it is probable the critics of the past will become the friends of the future. From what Mr. Page says the ground is a bonanza, and he says the bed rock is about forty feet from the surface, there is plenty of water and at least four miles of rich dirt to be washed. Tanner has already received several offers more than flattering, all of which he has refused.

Like a good many other men who have become famous or wealthy in the world, Mr. Tanner owes his success to his wife. But for her urging him not to give up he would have desisted long ago and abandoned what for a quarter of a century looked like a futile struggle for the impossible.

THE BONANZAS OF TINTIC.

What the Democrat Has to Say of the Mines of This Camp.

The Four Aces continues to hoist gold ore and can be depended upon as a regular shipper of high grade product from week to week.

At the Silver mine work is progressing very satisfactorily and the ore is coming in handsomely at the bottom of the shaft. Mr. Jenkins is highly elated over the prospects. George A. Edson & Son have the contract for driving the tunnel on the White Cloud ground, south of the Diamond. This property belongs to Mrs. Anna Marks and gives promise of developing in a paying mine. The Swansea mine has come into prominence within the past few months with a rapidity that is almost startling, and the merit the property now possesses is very largely due to good judgment and energy of Manager Hatfield, who has beyond doubt "shown his faith by his work."

At the South Swansea a 100-ton shipment is being prepared that will go to the smelter about the first of the week. We understand that the company do not intend to break ore for market, at present, but only clear out such as may be hoisted while opening ground for future stoping.

The work of cleaning out and timbering the main working shaft at the Sunbeam continues; at the same time a considerable amount of fine ore is being broken in the lower workings. When the ground is all caught up the shaft will be continued down another hundred feet. Look out for the Sunbeam.

From all appearances Graves and Anderson will yet make a stake out of the Showers mine. The part of the ground upon which they carry a lease had a very dry appearance for a time, but the boys stayed with it and have just broken into a fine body of ore that will no doubt put them on velvet. The Mammoth Mining company have just completed a tramway from the yard on the tunnel level to the foot of the second class dump below and are hoisting the ore and passing it through the crushers. The tramway is operated by a separate engine set up for the purpose. This indicates that the full concentrating capacity of the mill will be utilized at once. A new 40-horse power compound engine has been received at the mine and will be lowered to the 1,300 level, and the present winch, which is now down to the 1,500 will be carried on to the 1,300 level. Work is being pushed ahead at the Humbug with two shifts in the working tunnel and all the men that can be crowded on the road and other surface improvements. The tunnel is being driven ahead at the rate of about two feet each shift, and it is estimated that inside of ninety days this tunnel will be into the ore body at a point fully 100 feet below the present workings. This will leave solid hundred feet of stoping ground between the two levels.

BINGHAM BULLETIN NOTES.

Gray Copper and Ruby Silver Ore in the Republican Mine. The recent report of the sale of the Antelope mine was premature.

The Greeley mine is way up, but has been closed down pending the lead slump. This is another outfit that "don't have to." Andrew Scherck of the Phoenix company was up from the city Tuesday by his regular visit to the York hill bonanza, and reports it looking way up. Several leases have recently been let on this property.

A specimen of gray copper and ruby silver from the Republican mine, assayed by Cowan Tuesday, showed 155 ounces silver, 0.35 gold per ton. It was carried for copper, though evidently carrying about 30 per cent silver. Mr. Anderson has run the upper tunnel recently begun on the Republican about 15 feet, and is following a streak of ore which he thinks is 3 inches and has now widened to 10 inches. It is all good rock. There are about eight tons of it on the dump.

Notwithstanding some of the big producers have gradually closed down, owing to the low prices for lead and silver, much activity prevails among small leasers and prospectors, and a good number of promising claims are being developed, including some that are outputting gold ore of good grade. Those producing silver-lead ores will as a rule let it lie in the bins for the present.

The Ruby-Native, under lease to R. J. Gibson, is looking way up and now shows four feet of ore, assaying 18 to 20 ounces silver, \$3 gold and 42 to 55 per cent lead. There are about 30 tons of this ore in the bins. Mr. Gibson will soon extend the Black Dog road around Markham hill to the mine, but will ship no ore this fall unless there is a radical improvement in the market. "He don't have to."

The Dalton & Lark and other Utah dividend-payers will suspend monthly dividends until the metal markets improve. It is the sensible thing to do. The outlook in operation is a needless sacrifice. Considerable development and preparatory work is going on in the Dalton & Lark, and when production is resumed the mine will respond with echoes from half-a-dozen stops.

THE SOUTH SWANSEA.

A Big Shipment of Ore—Outlook For the Mine.

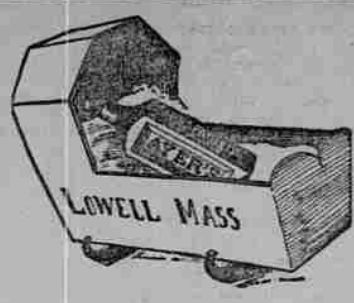

A shipment of South Swansea ore, comprising 110 tons, was received in the city yesterday and by Tuesday the lot will be sold on the open market. Developments in this property are going forward in a most satisfactory manner, and from all indications the mine will eventually become one of the heaviest producers in Tintic district. On the 300-foot level in this mine an upraise is being made to make connections with the shaft, and in doing so the work men are stopping in a four foot face of solid ore, while in the drifts the ore body is three and one-half feet in width.

It has not been the intention of the company to make regular ore shipments, but the precious metals are accumulating so rapidly, and this in frequent development work only, that frequent consignments will be almost compulsory, unless quotations get considerably lower, in which event the ore will have to be stored.

As depth is attained in the South Swansea, the gray lodes will be reached and carry greater values, and it is fair to presume that before spring the stock of the company will reach the dollar mark strictly on its merits. The Swansea action in the Tintic district, while the various mines and prospects are rapidly coming to the front in great shape.

Patent Surveys Ordered.

The surveyor-general has ordered the making of patent surveys as follows: No. 2291, for the Ortega lode, in Camp Floyd district, application made by J.

Fifty Years Ago.

This is the cradle in which they grew. That thought of a philanthropic brain; A remedy that would make life new. For the multitudes that were racked with pain. 'Twas sarsaparilla, as made, you know By Ayer, some 50 years ago.

Ayer's Sarsaparilla

was in its infancy half a century ago. To-day it doth "bedrizzle the narrow world like a colossus." What is the secret of its power? Its cures! The number of them! The wonder of them! Imitators have followed it from the beginning of its success. They are still behind it. Wearing the only medal granted to sarsaparilla in the World's Fair of 1893, it points proudly to its record. Others imitate the remedy; they can't imitate the record!

50 Years of Cures.

R. DeLamar through his attorney, H. A. Cohen, R. C. Gemmel, surveyor, No. 1222, for the Hilltop, Winner, Othello, Bonanza, Bonanza No. 3, and Misco lodes, in West Mountain district, application made by G. L. Bemis. Charles Tappan, surveyor.

Ore and Bullion Receipts.

The ore and bullion receipts yesterday were as follows: Commercial National bank, ores, \$11,500; National Bank Republic, gold bars, \$4,200; Bamberger & McMillan, ore, \$3,721; T. R. Jones & Co., ores, \$6,300; bullion, \$5,600; McCormick & Co., bullion, \$3,200; ores, \$4,400; cyanides, \$1,700; Wells, Fargo & Co., bullion, \$4,465.

Silver and Lead.

Silver and lead quotations yesterday were as follows: Wells, Fargo & Co., bar silver, 65 1/2 cents; lead, \$2.60. United Press, bar silver, 65 1/2 cents; lead, \$2.50 to \$2.55. Casting copper, 10 1/2 cents.

Bank Clearings.

The clearings of the associated banks yesterday were \$169,648. For the same day last year they were \$322,000. The week's clearings were \$1,066,057. For the same week last year they were \$1,455,010.

Mining Notes and Personalities.

Contractor Teller, of Mercer, will begin work tomorrow in the sinking of another shaft in the Bonanza mine.

Colonel S. B. Milner is working a force of men on the Milner group, in American Fork canyon, and states that in the face of a sixty-six foot tunnel a five-foot vein has been disclosed.

Professor Dugh and John Jukes have come from the Baldy mountain, and report several rich strikes, but otherwise they report business very dull in that district—Millard County Progress.

H. L. Driver & Co. have just completed another gas well at Lake Shore that registers a pressure of 235 pounds, and looks for gas from this new spouter as now being turned into the city mains daily.

Hon. P. T. Farnsworth returned from Frisco yesterday in his private car. Mr. Farnsworth reports everything is working in a satisfactory manner in the Horn Silver mine, and that the outlook for the south is good.

Colonel E. A. Wall, who is back from Mercer, states that the camp is growing daily in size and importance as far as the mining industry is concerned, and he is confident that in time Camp Floyd will develop into the greatest gold district in the south.

The Searchlight company is putting up a hoist on its Sunshine property and it is the intention to let a contract for the sinking of another hundred feet in the shaft, which is now down a depth of 100 feet, and it is believed that before this time the completed shaft will be encountered.

D. J. Frew has returned from Marysville and is now perambulating the streets of Salt Lake City, and is expected to stay here for a few weeks. Mr. Frew was thrown from a horse, sustaining injuries from which it will take several months to recover. His many friends here are glad to see him in his old-time haunts again.

Dave Sharp, who was in from Vernon yesterday, speaks very encouragingly of the outlook for the future of Blue Bird district. He mentioned particularly the showing in the Lawrence mine, owned by James Davidson, and stated that he and Mr. Wickensham visit the property again he will hardly know it.

W. L. Clark is back from the Gladstone mine, in Lincoln county, Idaho. The machinery for the mill for this property is now en route, the site for the plant is being graded, and it is hoped to have the mine in operation by early day. The mine is looking well and development work is progressing in a satisfactory manner.

L. J. Bates, the well-known mining man, will leave within a few days for New York city, accompanied by his son, L. C. Bates, Jr., who will enter the school of mines at Columbia university. Mr. Bates, Jr., is a young man of great promise, and at Columbia college he will be an active and successful career in the business of mining.

E. E. Crooks, stock broker, 41 West Second South street, Telephone 97.

The First Week's Vote.

The first week's voting in the contest for the carload of coal to be given away by Walker Bros. Dry Goods company to the most popular charitable institution, closed last night with results as follows: Orphan's Home and Day Nursery, 7,505; Ladies Aid society, 4,320; Saint Ann's Orphanage, 4,283; Free Kindergarten association, 2,189; National Woman's Relief society, 3,084; Ladies Hebrew Benevolent society, 2,651.

It has not yet been voted for every 25 cents worth of goods at our store. The car of coal will be given away Oct. 15, contest closes Oct. 10. WALKER BROS. DRY GOODS CO.

Auction! Auction!

On Monday, Sept. 21, at 10:30 a. m., No. 72 South First West street, Parlor rockers, fine bed lounge, lot of lace curtains, fine hanging lamp, clock and center tables, Brussels and other carpets, two bedroom sets, springs, mattresses and bedding, two good feather beds, child's bed complete, fine oak dining room set, glass and china, glass door cupboard, dining chairs, tables, cook stoves, pictures, China, glass, silver, granite ware, lot of fruit jars, Arnold steam cooker, lot of kitchen utensils, etc., etc.

K. A. ANDREWS, Auctioneer.

O.W. MOYLE IS RECEIVER

For Western Hardware Company By Consent of Interested Parties.

FILES HIS BOND FOR \$15,000

AND RESUMES CONTROL AS WHEN HE WAS ASSIGNEE.

Mary E. Gilmer and Wells, Fargo & Co. File Answers in the Suit Brought Against Them By McCormick & Co.—District Court Orders, Probate Business and General Doings of the Courts.

The application of the Colorado Fuel and Iron company for the setting aside of the assignment made by the Western Hardware company to Oscar W. Moyle and for the appointment of a receiver, which was set to come up for hearing next Wednesday, got in ahead of time and was disposed of in short order by Judge Ritchie, yesterday, for the reason that the parties reached an agreement between themselves and came into court where the plaintiff requested that the assignment be set aside and the assignee, Mr. Moyle, be appointed as receiver. The other parties to the suit consenting thereto the order was made and Mr. Moyle's bond fixed at \$15,000, to be approved by the court. Later in the day Mr. Moyle filed his bond and took possession of the property.

ANSWERS FILED.

In the Suit of McCormick & Co. vs. Wells, Fargo, et al. Separate answers were yesterday filed in the Third district by the defendants, Mary E. Gilmer and Wells, Fargo & Co., in the suit of W. S. McCormick & Co. vs. Mary E. Gilmer, Wells, Fargo & Co., Catherine C. Belcher and Lloyd Tevis in which the plaintiff sues to recover \$23,556 and interest.

In Mary E. Gilmer's answer all the mutual allegations of the complaint are denied and for an affirmative defense it is alleged that John T. Gilmer, prior to his death, was indebted to Wells, Fargo & Co. in the sum of \$170,000, and that to secure the same he conveyed to John E. Dooley the real estate mentioned in the complaint and also conveyed to Dooley to further secure the said indebtedness certain mining property, consisting of stock in the Ham's Horn mine, Leadwood, Fern Mining company, Highland Mining company and the Stewart Mining company; that the deed to said property was an absolute conveyance to Dooley, but that the property was really to secure the indebtedness of Gilmer to Wells, Fargo & Co. a bank of which Dooley was cashier. It is also claimed that certain promissory notes made by Monroe Salisbury to Wells, Fargo & Co. secured by a mortgage on property in Illinois should have been satisfied by the sale of the Illinois property and not by the property of John T. Gilmer conveyed to Dooley.

On August 26, 1895, Wells, Fargo & Co. sold the property conveyed to Dooley and this defendant bought it for \$22,000 and is now the owner of the same and recovered it to Wells, Fargo & Co. to secure an indebtedness of hers to that firm of \$148,000 and a large portion of said indebtedness, it is alleged, was incurred by her on account of the contingent liability of John T. Gilmer on account of the indebtedness of Monroe Salisbury to Wells, Fargo & Co.

The defendant then alleges that the said indebtedness will prove to be an absolute liability, and that she will have to pay the whole thereof subject only to any abatement that may be realized by the defendant, Wells, Fargo & Co., out of the proceeds of the sale of the Illinois property mortgaged by Monroe Salisbury to Wells, Fargo & Co., and that after the payment of all prior liens and indebtedness out of the proceeds of the mortgaged property, no net amount will be realized by the plaintiff or reduction of the debt evidenced by the promissory notes.

Wells, Fargo & Co.'s answer is in substance the same as that of Mary E. Gilmer, and alleges that Mary E. Gilmer owes them \$54,410, and that their entire security for the same rests upon the mining shares and real estate and the ultimate individual liability incurred by Mary E. Gilmer by virtue of the notes by her executed to Wells, Fargo & Co.; and that if said sales of real estate and said stock should by the court be declared null and void, and the title to the same revert to Mary E. Gilmer, then this defendant sets up and claims its equitable lien on the property by reason of the mortgage and pledge given by John T. Gilmer in favor of this defendant.

Wherefore this defendant, Wells, Fargo & Co., prays to be hence dismissed with costs.

District Court Orders.

John H. Bowman vs. Salt Lake City and Salt Lake county; demurrer to last amended complaint overruled as to first and second causes of action and ten days allowed to answer; demurrer sustained as to third cause of action.

Heesch-Davis Sanitary company vs. Vin Krolow; judgment for plaintiff for \$127.42 by default.

Roswell Hutchins vs. L. W. Dittman; motion to dismiss argued and submitted.

William Gibley vs. A. J. White et al.; leave granted to amend complaint by substituting James Briggs, executor for John T. Cook, deceased, as plaintiff.

Rachael Ferguson vs. Jeanette Ann Timpon et al.; judgment and decree of foreclosure for the plaintiff by default.

Johna Colt et al. vs. C. M. Freed; time to answer extended till Tuesday evening.

K. Charles Barton et al. vs. William Campbell et al.; same order.

John W. Chaffler et al. vs. Sheep Rock Mining and Milling company; same order.

Pacific States Savings and Loan association vs. James Hunter; motion for a receiver denied.

Glenn R. Bothwell vs. S. S. Markham et al.; motion for a new trial denied.

Sterling Silver—AT—LEYSON'S.

THERE was never a time in the history of our business, when manufacturers gave to the public so many new and artistic designs in silver, to equal the present.

We speak not alone in favor of Flatware Designs, but also of those in the new Brush sets—Toilet Articles and novelties. The trade is demanding finer goods than it has during the past three years.

You will find our cases crowded with the newest ideas in silver. We do not buy promiscuously, but select carefully from the best manufacturers.

We invite your inspection and patronage.
